Motion Detection

3MP Full HD Video Recording

Designed to reflect an improved picture quality in Full HD video, preventing pixilation in the video feed and allowing for a clear view of every detail.

Coloured Night View

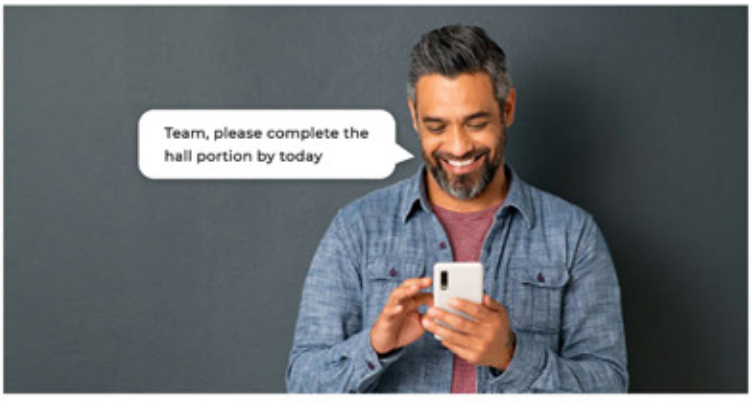
Provides perfect clarity full-color video even in low light because the larger sensor's pixels collect more light, which enhances image quality even in low light.

MicroSD Card Support

Use a MicroSd Card to record your video; it can support up to 2560B of data.

Two Way Audio Communication

Allows you to communicate with your loved ones wherever you are, which includes using a phone to talk while watching a live video feed.



Motion Detection

Camera recognises human detection and intelligent notifications, so you will only receive a warning when it is necessary. If there is enough variation between frames, a camera will turn on automatically.
